## Work Experience

### Cohete | eCommerce & Growth Marketing

(Argentina)

Frontend Developer

January 2024 – July 2024

- Launched two SaaS platforms for their e-commerce business, developed a Figma like Next.js drag-and-drop website builder for creating websites/sales funnels.
- Designed and developed many eye-catching and effective landing pages for different products, which helped increase online sales and improve brand visibility.
- Closely work with the CEO, collaborate with designers and developers, ensuring seamless integration of advanced features and functionalities.

### The Happy Hippies Show *sister concern of NsNco*

(India)

Frontend Development Intern

January 2023 – Oct 2023

- Developed and launched their base product and facilitated the seamless transition of offline users to an online platform entirely from scratch as a sole frontend developer.
- Translated 700+ artists' data into compelling selling profiles, contributing to successful capital fundraising efforts and fostering business growth.
- Bridging client needs and technical implementation by facilitating clear communication with backend developers, resulting in the effective delivery of API requirements.

## Projects

### Quick Cart

Live / Code

*A faster to integrate and easy to maintain cart plugin for your website*

- Developed a React package that reduces the time and effort required to build e-commerce solutions from scratch.
- Designed an eye-catching landing page and developed components for products, cart, and checkout, enabling a Stripe onboarding payment system for users to receive payments from customers on their behalf.
- Provided a user-friendly dashboard for uploading and managing products & theming components color.

**Technologies:** Next.js, Express, MongoDB, Firebase, Tailwind, NPM

### Staff Deck

Live / Code

*An HR management tool that helps companies organize employees, time and attendance, Talent Onboarding, Managing Events, and more*

- Led the complete design and development of the application within a 6-person team, delivering exceptional results within an impressive 2-week timeframe. Effectively collaborated with team members to achieve project goals while maintaining high-quality standards.
- Designed the home page of the dashboard, featuring various charts that helped HRs monitor the company's health and statistics.
- Integrated Firebase Admin SDK for managing permissions for admin and super admin. Added a calendar feature for event scheduling and designed a user-friendly "Careers" page.

**Technologies:** React, Redux, Firebase, Node/Express, MongoDB, Tailwind

## Education & Certification

### National University

Bachelor of Social Science in Sociology

August 2022 – Present

Focusing on gaining a deep understanding of human behavior, social dynamics, and self-development.
