## Technical Skills

---

**Proficient:** React, Redux, JavaScript, HTML/CSS, Tailwind

**Comfortable:** Node.js, Express.js, MongoDB, Firebase

**Developer Tools:** Git, VS Code, Deployment

## Work Experience

---

### The Happy Hippies Show *sister concern of NsNco*

Remote, India

*Frontend Development Intern*

*January 2023 – July 2023*

- Developed and launched their base product and facilitated the seamless transition of offline users to an online platform entirely from scratch as a sole frontend developer
- Translated 700+ artists' data into compelling selling profiles, contributing to successful capital fundraising efforts and fostering business growth
- Played a pivotal role in bridging client needs and technical implementation by facilitating clear communication with backend developers, resulting in the effective delivery of API requirements

## Projects

---

### Staff Deck

[Live / Code](#)

*An HR management tool that helps companies organize employee databases, Time and attendance, Talent Onboarding, Managing Events, and more*

- Led the complete design and development of the application within a 6-person team, delivering exceptional results within an impressive 2-week timeframe. Effectively collaborated with team members to achieve project goals while maintaining high-quality standards
- Designed the home page of the dashboard, featuring various charts that helped HRs monitor the company's health and statistics
- Integrated Firebase Admin SDK for managing permissions for admin and super admin. Added a calendar feature for event scheduling and designed a user-friendly "Careers" page

**Technologies:** React, Redux, Firebase, Node/Express, MongoDB, Tailwind

### Daily Deals

[Live / Code](#)

*A platform for buying and selling used laptops and accessories*

- Designed and developed a user-friendly dashboard catering to distinct users: seller, buyer, and admin
- Added promote features allowing sellers to promote their products for better reach
- Developed real-time chatting functionality using socket.io, enabling users to interact directly with sellers for efficient communication

**Technologies:** React, Node/Express, MongoDB, Firebase, Tailwind

### OLX Clone

[Live / Code](#)

*A Clone of OLX which is a popular e-selling platform in India*

- Replicated the original olx.com website with 99% accuracy, aligning closely with the UI as of 2022
- Enabled user authentication, allowing seamless listing of items for sale, making purchases, and promoting products for sellers and buyers
- Demonstrated problem-solving abilities by tackling challenges related to Login/Register modal UI replication and ensuring the clone closely resembled the original website's appearance

**Technologies:** React, Node/Express, MongoDB, Firebase, Tailwind

## Education & Certification

---

### National University

*Bachelor of Social Science in Sociology*

*August 2022 – Present*

Focusing on gaining a deep understanding of human behavior, social dynamics, and self-development

### Programming Hero

*Complete Web Development Course*

*June 2022 – December 2022*

Held a perfect score of 100% on each assignment out of total 12, with an average of 96.44%. Submitted the assignments within the deadline. Collaborated with fellow teammates to participate in bootcamp hackathon and secured a black-belt.
