PROFESSIONAL EXPERIENCE

Cohete | eCommerce & Growth Marketing — *Argentina, Remote*   *Jan 2024 - Jul 2024*
Frontend Developer

- Developed two no-code drag-and-drop website builders in **Next.js** which boosted their product launches, enabling designers to create UI directly.
- Designed 10+ landing pages (UI) for various products, developed a task management tool (kanban board) in **React.js**, shipped features like cart-checkout plugin, reel-like product media, etc.
- Worked in an agile development team of 5+ members, collaborating with designer and backend developers, meeting expectations of the marketing team daily.

NSNCO — *India, Remote*   *Jan 2023 - Oct 2023*
Frontend Developer (Intern)

- Developed a talent-hiring platform, transitioning offline users into an online system from Google Sheets data.
- Converted 700+ artist's data into selling profiles, addressing client feature requests to support fundraising.
- Closely worked with the Founder and managed a small team of backend developers, bridging the gap between technical and non-technical team.

PERSONAL PROJECTS

Quick Cart — *A npm package that turns your website into e-commerce*   Live | Code

- Developed a React.js package that reduces the time and effort required to build e-commerce solutions from scratch.
- Designed an eye-catching landing page in Next.js and developed pre-built components for the plugin, enabling a Stripe onboarding payment for users to receive payments on their behalf.
- Provided a user-friendly dashboard for managing products, handling payments & theming components.

Tech stack: Next.js, Express, MongoDB, Firebase, Tailwind, npm

Staff Deck — *An HR management tool that helps companies organize employees, time*   Live | Code
and attendance, Talent Onboarding, Managing, Events, and more

- Led the end-to-end design and development of the application within a 6-person team, delivering the project within 2 weeks. Collaborated with team members in daily Scrum to achieve project goals.
- Designed the dashboard displaying charts to monitor company health and statistics.
- Integrated **Firebase Admin SDK** for managing permissions for admin and super admin. Added a calendar feature for event scheduling and designed a user-friendly "Careers" page.

Tech stack: React, Redux, Firebase, Node/Express, MongoDB, Tailwind
